Career Objective:

Intent to build a career with leading corporate of hi-tech environment with committed and dedicated people, which will help me to explore myself fully and realize my potential.

Summary of Skills and Expertise:

- 12+ years of experience in IT industry with **Configuration Management, Continuous Integration, Continuous Deployment, Release Management and Cloud Implementations analysis**, design and maintenance of client/server and web applications as the primary tasks.
- **Architecting and designing best fix cloud components** on AWS platform.
- Working experience on AWS cloud, architecting highly available, scalable and fault tolerant architectural solutions for clients to help them migrate successfully from current infrastructure (non cloud / Cloud) to AWS cloud.
- Highly experienced Dev Ops Engineer in **Automating, Configuring and deploying applications on AWS Cloud** platform.
- Strong knowledge and skills on AWS Architecture Design, especially in Production, Development and Testing Environment.
- Strong knowledge and real time experience in **EC2, S3, RDS, SES, VPC, Route 53, EKS, SES, CloudFront, Cloudformation, CodeDeploy, ECR and IAM** to name a few in AWS.
- Solid experience in all the phases of Software development life cycle starting from requirement gathering, analysis, design, coding, implementation and support within devops & cloud engineer capacity.
- Experience in Platform Monitoring with **Sensu, Prometheus** and APM monitoring with **New-Relic**.
- Ability to research, propose and prototype new principles, technologies, tools and concepts and integrated them into the teams collective knowledge.
- Extensive experience in using **Build Automation Dev Ops tools like, Jenkins, Ansible, ci/cd pipelines**.
- Extensive experience in **configuration management tool Ansible & Puppet** which enables seamless infrastructure provisioning for site-redundancy with staging/development environments.
- Experience in monitoring System/Application Logs of server using logstash, elastic search, kibana (OpenDistro**ELK Stack**)
- Extensive experience in administering different flavors of Unix and Linux.
- Experienced on Micro-Service based architecture with **deployment on Kubernetes (EKS)** with **docker**.
- Lead Experience in production support team environment management.
- Raising support calls with vendors and involved in postmortem analysis for server problems.
- Extensively experience in the design and implementation of Continuous Integration, Continuous Delivery, Continuous Deployment and Dev Ops processes's, working with technologies and platforms including Java, Jenkins, PHP, My SQL, Mongo DB, AWS, across the industry verticals like E-commerce, Media, Marketing & ITES.
- **AWS Certified Associate.**
- **Certified Kubernetes Administrator**

PROFESSIONAL EXPERIENCE:

Intigral Middle East (an STC company)

Since May 2016

*Infrastructure Expert- Devops & Cloud
Dubai*

Working as a Lead Devops Engineer with Intigral Middle East, Dubai, An STC company. I am responsible for Cloud Platform management of Backend application for the OTT product named Jawwy TV catering services across KSA, Oman, Bahrain and Kuwait.

Responsibilities
