Govindaraj Raju

(M-UAE) +971 552272029 govind.cnd@gmail.com www.govindraj.me

Professional Summary

Cloud Solution Architect with 18+ years of experience designing, modernising, and operating cloud and infrastructure platforms across telecom, e-commerce, and media environments. Former Amazon Web Services Senior Technical Account Manager with a strong track record in customer-facing architecture, cloud migration, platform modernisation, resiliency engineering, cloud cost optimisation, and DevOps transformation. Experienced in working with engineering teams, platform owners, business stakeholders, and C-level leaders to design scalable, secure, and operationally resilient cloud solutions aligned to business priorities. Brings a blend of architecture depth, enterprise stakeholder management, and hands-on delivery experience across AWS-led cloud environments.

Core Expertise

- Cloud Solution Architecture
- Infrastructure & Platform Architecture
- AWS Architecture, Migration & Modernisation
- Cloud Adoption Strategy & Technical Advisory
- Resilience, High Availability & Disaster Recovery Design
- Cloud Cost Optimisation / FinOps
- DevOps Transformation & Platform Engineering
- Architecture Reviews & Operational Governance
- Executive Stakeholder Management
- Cloud Operations, Reliability & Risk Reduction
- CCOE & Digital Transformation
- Proof of Concept Design & Technical Enablement

Technology & Platforms

Cloud Platforms: AWS, Huawei Cloud
Architecture & Operations: Cloud migration, platform modernization, disaster recovery, resiliency design, operational reviews, cloud governance, risk management, architecture workshops.
DevOps / Platform: CI/CD, DevOps transformation, infrastructure automation, Kubernetes.
FinOps / Optimization: Cloud cost analysis, cost optimization, usage governance, architecture efficiency-reviews.
Certifications: AWS Certified Solutions Architect – Associate, AWS Certified SysOps Administrator – Associate, AWS Certified Security – Specialty,
Certified Kubernetes Administrator (CKA), Scrum Certified, FinOps Practitioner

Professional Experience

Saudi Telecom Company

Senior Cloud Infrastructure Architect (Contract Consultant)
Dubai, UAE | Aug 2024 – Now

Working as a senior architect in consulting capacity supporting STC cloud initiatives across cloud architecture, platform modernisation, migration planning, resiliency improvement, and cloud cost optimisation.

Key Responsibilities & Contributions

- Lead architecture and design activities for cloud platform modernisation initiatives across public cloud environments, with a focus on scalability, resilience, and operational efficiency.
- Design and support cloud migration solutions, including infrastructure planning, deployment design, and migration execution across AWS and Huawei Cloud environments.
- Drive cloud platform optimisation by reviewing architecture, availability, resiliency, and operational health across existing workloads and infrastructure services.
- Develop solution designs and proof-of-concept implementations to support cloud adoption, modernisation planning, and technical decision-making.
- Support end-to-end management and improvement of cloud environments, including architecture reviews, migration planning, and infrastructure optimisation.
- Designed and executed a multi-cloud FinOps governance framework across AWS and Huawei Cloud, introducing cost visibility metrics that optimized multi-million dollar infrastructure budgets.
- Partner with technical and business stakeholders to align cloud architecture decisions with platform goals, service reliability, and cost control objectives.

AMAZON WEB SERVICES (AWS)

Senior Technical Account Manager – Strategic
London, United Kingdom | Jul 2022 – Aug 2024

Acted as trusted advisor to C-level stakeholders of a strategic enterprise client; facilitated 20+ Well-Architected reviews and modernization workshops to accelerate cloud maturity and mitigate architectural risks.. Worked closely with engineering teams, operational teams, and senior business stakeholders to improve cloud adoption, platform resilience, cost efficiency, and operational maturity.

Key Responsibilities & Contributions

- Served as the primary technical advisor and trusted cloud partner for a strategic AWS customer, aligning cloud adoption and operational improvement plans with business priorities and technical goals.
- Led architecture guidance across reliability, operational excellence, security, cost optimisation, and service adoption, helping the customer improve the value and maturity of its AWS estate.
- Conducted architecture workshops, technical reviews, and Well-Architected discussions to support cloud modernisation, resilience improvements, governance enhancements, and workload optimisation.
- Spearheaded a cloud cost optimization initiative for a strategic enterprise client, identifying **$6 M** in annual savings through rightsizing and architecture re-engineering.
- Partnered with customer stakeholders across engineering, operations, platform, and executive leadership teams to address cloud adoption blockers, technical risk, and roadmap priorities.
- Proactively reviewed the health of AWS environments and worked with customer teams to improve operational resilience, service usage, risk mitigation, and cloud governance.
- Coordinated AWS internal specialists and service teams to accelerate issue resolution, unblock strategic initiatives, and support technical planning for large-scale cloud environments (~ **USD $ 110M ARR**) .
- Delivered strategic business reviews and technical advisory engagements for senior decision-makers, helping shape cloud strategy, governance priorities, and platform investment decisions.

INTIGRAL MIDDLE EAST (AN STC COMPANY)

Infrastructure Expert – DevOps & Cloud
Dubai, UAE | May 2016 – Apr 2022

Led infrastructure, cloud, and DevOps initiatives supporting digital platform and media technology environments. Responsible for cloud platform design, automation, migration planning, infrastructure reliability, and operational improvement across enterprise workloads.

Key Responsibilities & Contributions

- Designed and implemented cloud and infrastructure solutions to improve scalability, resilience, deployment efficiency, and service reliability across business-critical environments.
- Supported cloud migration and infrastructure modernisation initiatives, helping move workloads and services toward more scalable and operationally efficient cloud-based platforms.

- Led DevOps transformation efforts focused on automation, CI/CD improvement, deployment consistency, and better collaboration between infrastructure and application teams.
- Contributed to platform reliability, disaster recovery readiness, and operational resilience through architecture improvements, automation, and infrastructure optimisation.
- Worked closely with cross-functional teams to evaluate new technologies, build proof-of-concept solutions, and improve platform capabilities in support of evolving business and product requirements.
- Provided technical guidance across infrastructure, operations, and cloud adoption initiatives, helping teams improve delivery speed, operational stability, and platform readiness.

CITRUSS TV

DevOps Engineer
Dubai, UAE | Jul 2015 – May 2016

- Supported DevOps and infrastructure operations for digital commerce and media platforms, with responsibility for deployment processes, platform stability, and cloud/infrastructure support.
- Worked on environment management, automation, and operational support to improve release efficiency and service reliability.
- Assisted with platform optimisation and operational improvements across infrastructure and application support workflows.

UST GLOBAL

System Analyst – DevOps
India | May 2014 – Jul 2015

- Supported DevOps and system engineering initiatives across enterprise environments, including deployment support, infrastructure operations, automation, and environment management.
- Worked with application and infrastructure teams to improve deployment consistency, operational support processes, and platform stability.

QBURST TECHNOLOGIES

System Administrator – Cloud & DevOps
India | Oct 2010 – Apr 2014

- Managed cloud and infrastructure administration responsibilities, including environment support, system reliability, deployment activities, and platform operations.
- Contributed to cloud adoption and DevOps practices by supporting automation, system administration, and operational improvements across development and production environments.

MAGUZLABS & FREELANCE

Founder / System Engineer
India | Oct 2008 – Sep 2010

- Delivered infrastructure and system engineering services across client environments, supporting server administration, deployment, troubleshooting, and platform setup.
- Managed a range of technical responsibilities across infrastructure support, implementation, and client-facing service delivery.

Education

Bachelor of Technology (Information Technology)
University of Calicut, India | 2005 – 2008
